

VS Safety is a world-leading provider of wireless security and home automation solutions. Our company is well recognized for the track record of technological innovations and for the high quality of our products.

## Accessories

### Introduction

The **External PIR Motion Detector** represents a breakthrough design from the traditional sense to a brand new vision of its definition.

With its built-in Dual Sensors & Lens and specially designed adjustable Semi-hemisphere Lens brings the conveniences for easy operation. The detection angle can be manually adjusted upon the Height & Size of the small animals to eliminate the chance of false alarms caused by them, cars or other outdoor disturbances.

### Specifications

Power Supply: Lithium AA battery \* 1  
Battery Life: Over 5 years with Low Battery Detection  
Frequency available: 433MHZ / 868.35MHZ / 868.6375MHZ  
(All other frequencies are available upon request)  
Range: 433MHZ or 868.35MHZ: Over 200 meters in open space  
868.6375MHZ: Over 300 meters in open space  
Operating Temperature: -20 ~ +50  
Humidity: Up to 95% non condensing  
Dimension: 94.5mm x 42mm
