

Description

M700 video monitor, is a Beoview full IP solution for the communication in luxury homes, residential buildings, condominiums or office buildings.

Thanks to its technology and Peer2Peer facilities M700 monitors do not require any server on the installation. The protocol of communication is TCP/IP which makes possible to be connected to a LAN together with other IP devices in the same installation.

The system never becomes busy thanks to the multi-channel feature. The touch capacitive screen displaying big icons make it friendly user specially for elderly or disabled people.

Materials such as the glass screen and the metal aluminium frames combined with the high fidelity full duplex audio communication and the real time video streaming make this product exclusive.
